

# Children and Young People’s Mental Health Early Intervention Service SURVEY

NHS North East Essex is part of your local NHS which “buys” health services for local people.

We currently “buy” three types of services which next year we would like to bring together into one. This may mean it will be provided by just one provider or more than one if they choose to work together.

These services are:

- *Eating disorder service for young people* - This service is for people with eating and body image difficulties
- *Talking therapies service* – People are offered mental and emotional support to help them feel better
- *Informal advocacy service* - This gives children and young people advice to help them

We need to tell the future service how we want them to work.

We would like to understand from you what “good” should look like so we know how well the service is working in the future.

What you tell us will not be shared (including with your parent or guardian) in any way that identifies you, and we do not need to know your name. You can ask for help from others if you want to.

You can send this back to us by post or e-mail by **Wednesday 16th August**.
